If you have specific questions about a feature or need additional information, we encourage you to call us at 402.861.8800 or email us at info@proware-cpa.com.

What is 10-Key Calculator Plus?

10-Key Calculator Plus (TC+, for short) is a full-featured tape calculator that you can use with any program. Cut and paste the results, create a running tape, and even print the results to a printer to attach to documents. Use a traditional 10-Key layout or a handheld calculator layout. Both have the look and feel of real calculators and interact with the mouse or keyboard for quick data entry. You can scroll backwards and forwards on the tape and even cut and paste multiple lines of numbers and results into virtually any Windows-based program. TC+ even displays the information that's currently in your memory keys so you don't even have to press a button to recall it!

Features

The following are some of the most significant features you will find in 10-Key Calculator Plus:

- Use the calculator with a 10-Key layout or handheld layout
- Keep the calculator "Always on Top" of other applications so it is available while you are running any Windows-based program
- Copy and paste any of the results of TC+ into any other Windows-based program
- Print the contents of your tape to your printer or to a file for later use
- Select from 0 to 6 decimal places to display
- Choose the number of lines to display at once or hide the tape altogether
- Includes online help to guide you through the many features of 10-Key Calculator Plus

10-Key Calculator Plus will become indispensable as you begin to use it with all of your various programs. You no longer have to interrupt your work to add numbers on your desktop or handheld calculator. In addition, the results can be copied and pasted to your program, making traditional calculators a thing of the past. Print the contents of the tape to your Windows printer or save them for use later by printing them to a file. Once you start using TC+, you will never want to use a desktop calculator again.

Try TC+ now to see the just how useful it can be for you and your company!!
